

GARDEN RANGE

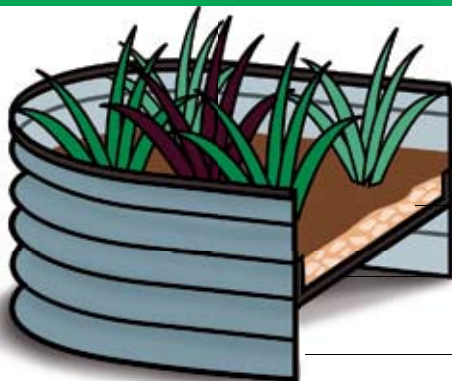

BY AMARI TANKS

Amari has released a stylish new range of Garden beds available in a variety of different shapes and styles that can accommodate for your domestic needs.

Each garden bed is made from Z600 steel or can come in Colour Bond if desired to match your surroundings. Our garden beds can be fitted with a plastic base which is positioned halfway between the internal walls. Your new garden bed will need less soil, so you won't waste water and it will also be much lighter for easy manoeuvrability.

Also available
Water troughs and fish ponds!

Minimal water usage design
for garden bed setup

Plastic never rust base

Z600 steel
or Colour Bond steel
